Dear colleagues,

Today we would like to invite you to our next webseminar in our English-language online series on **"Another dog with otitis: how to deal with it?"**

Canine otitis is a frequent reason for consultation. Why do they reappear after, apparently, correct treatment? Why do they become chronic, and often challenging to manage? In this webseminar, we will discuss the main points of diagnosis and therapy of canine otitis externa, emphasising the importance of identifying and treating all participating factors."
